Tim Phillips, Designer

About

My passion for design is deeply rooted in the intricate details, seamless interactions, and harmonious systems that together, create unified user experiences.

I relish the opportunity to engage with projects at their inception, as well as diving into established problem areas to make meaningful contributions.

Résumé

Experience

Carsales (2021 - present)

I'm currently working as the Product Designer on the Digital Retailing team, designing their consumer facing product, carsales SELECT, across web and native platforms. The SELECT project is dedicated to empowering consumers to complete a greater portion of the car-buying journey online.

Assembler (2020 - 2021)

I held the role of Lead Product Designer at Assembler, where I led the design across multiple platforms and established their design system. In addition, I provided support to the engineering team through front-end web development efforts.

PwC Australia (2018 - 2020)

During my time in PwC Australia's New Ventures unit, I led both product design and front-end web development efforts within the Automation Engine team. The technology we developed played a crucial role in enabling internal teams to build and manage web applications.

The Just Group (2017 - 2018)

Predominantly worked on the Smiggle brand, designing web and email content for their global market base (AU, UK, IRE and Asia at the time). Also working across the Just Group's other core brands in varying capacities.
